UNITED STATES FOREIGN TRADE

SUMMARY REPORT FT 950-E

MAY 1960

FOR RELEASE July 18. 1960

BUREAU OF THE CENSUS

Robert W. Burgess, Director

SPECIAL NOTICE See page 5 of the February 1960 issue

of this report for "Notice of Possible Discontinuance of Separate Summarized Totals for

tentenments of Separate Summarized Totals for thited States Export and Import Trade with the Dependencies of Western Europe."

EXPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that the decrease in United States exports of domestic and foreign merchandise, from \$1,822.9 million in April to \$1,791.6 foreign merchandise, from \$4,822.9 million in April to \$1,791.6 million in May reflected, in part, decreases in exports to the following areas: Canada, from \$359.6 to \$352.4 million; Latin American Republics, from \$317.1 to \$313.2 million; dependencies of Western Europe, from \$61.3 to \$57.7 million; and "all other countries", from \$476.3 to \$452.4 million. During the period, exports to Western Europe increased slightly from \$608.5 to \$615.9 million. These totals include data on exports of Special Category commodities which dropped from \$189.4 million in April to \$170.4 million in May.

The Bureau stated further that, with Special Category commodities excluded, exports of domestic and foreign merchandise declined from \$1,633.5 million in April to \$1,621.2 million Exports to Latin American Republics fell from \$306.7 million in April to \$301.2 million in May, but noticeable increases were reported in exports to sterling area countries, from \$288.8 to \$320.0 million and to O.E.E.C. countries, from \$503.0 to \$530.1 million. Among the continents, decreases were reported in exports to Asia, North America, and Africa while increases were reported in exports to Europe, Australia and Oceania, and South America.

The decrease in exports to Asia, from \$320.0 million in April to \$292.0 million in May resulted principally from

decreases in exports to individual countries of this continent decreases in exports to individual countries of this continent as follows: Pakistan, from \$17.2 to \$11.2 million; India, from \$64.0 to \$58.1 million; Japan, from \$11.4 to \$106.0 million; Israel, from \$12.4 to \$8.6 million; and the Republic of the Philippines, from \$26.2 to \$22.7 million. The decline in exports to North America from \$502.7 to \$485.5 million was chiefly the result of a decrease in exports to Canada, from \$251.2 to \$24.6 million was chiefly the result of a decrease in exports to Canada, from \$251.2 to \$24.6 million was chiefly the result of a decrease in exports to Canada, from \$251.2 to \$24.6 million was chiefly the result of a decrease in exports to Canada, from \$251.2 to \$24.6 million was chiefly the result of a decrease in exports to Canada, from \$251.2 to \$24.6 million; and the first continuous content of the conten \$351.3 to \$344.5 million. Exports to Africa dropped from \$72.5 to \$63.1 million due primarily to declines in exports to the United Arab Republic (Egypt Region), from \$15.9 to \$9.1 million and Morocco, from \$4.1 to \$1.9 million.

During the period, exports to Europe rose from \$526.4 to \$557.8 million reflecting noticeable increases in exports to the United Kingdom, from \$98.5 to \$134.4 million; Netherlands, from \$51.9 to \$58.7 million; and Sweden, from \$27.0 to \$32.0 million. Exports to Australia and Oceania rose from \$31.3 to \$39.7 million with increases in exports to New Zealand, from \$2.8 to \$7.9 million and Australia, from \$27.6 to \$30.8 million accounting for most of the rise.

The slight advance in exports to South America from \$180.6 to \$183,2 million reflected a gain in exports to Brazil, from \$30.8 to \$40.0 million which was largely offset by a decrease in exports to Venezuela, from \$50.2 to \$41.4 million.

EXPLANATION OF STATISTICS

COVERAGE: Export statistics include government as well as non-government shipments to foreign countries. The export statistics, therefore, include Mutual Security Program military aid, Mutual Security Program economic aid, and Department of the Army Civilian Supply shipments. Separate figures for Mutu-al Security Program military aid are shown in the footnotes of this report. Shipments to United States armed forces and diplomatic missions abroad for their own use are excluded from export statistics. United States trade with Puerto Rico and United States possessions is not included in this report, but the export trade of Puerto Rico with foreign countries is included as part of the United States export trade. Merchandise shipped in transit through the United States between foreign countries is not included in export statistics.

COUNTRY DEFINITION: Although the country of destination is defined as the country of ultimate destination or the country where the goods are to be consumed, or further processed or manufactured, the statistics do not always reflect this definition, as the shipper may not know the ultimate destination of the shipment. In such cases, the shipments are credited to the last country, as known to the exporter at the time of shipment from the United States, to which the goods are to be shipped in their present form. It follows, therefore, that the statistics will tend to be overcounted for shipments to transshipments or merchanting countries and undercounted for other countries. explained in the footnotes to the table, exports of Special Category commodities are not included in any of the published country totals, for reasons of security.

VALUATION: The valuation definition used in the export statistics is the value at the seaport, border point, or airport of exportation. It is based on the selling price (or cost

if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportation and other costs beyond the United States port of exportation are excluded. However, in some instances the valuation may not be reported in accordance with this definition, particularly where the export value is difficult to determine or must be estimated. None of the values have been adjusted for changes in price level.

EFFECT OF SAMPLING: The value of export shipments individually valued at \$100-\$499 (about five percent of total exvalue) is estimated by sampling. Effective with the statistics for January 1960, the previous sample ratio of 10 percent has been increased to a 50 percent sample for countries other than Canada with the 10 percent sample being retained for Canada. The estimated values are distributed among the area continent and country totals. For the the sport figures in this report, the probable variability due to sampling is less than \$50,000 or less than one persent. For the \$79 figures, the probable variability due to sampling is less than \$0,000 or less than two percent of the individual totals shown. The largest variation from rounding of figures is \$50,000 for further information regarding ampling procedures, see the September 1953, February 1954, squary and June 1956, and the October-December 1959 issues of Foreign Trade of attistics Notes. The estimated values are distributed among the area, figures in is less

Further information regarding coverage, country de ton valuation, etc., is contained in the "Ceneral Explanation" foreword of Report No. FT 410. For complete statement, so foreword in Foreign Commerce and Navigation of the United States.

UNITED STATES EXPORTS OF DOMESTIC AND FOREIGN MERCHANDISE, BY COUNTRY OF DESTINATION: MAY 1960 AND SELECTED PERIODS

(In millions of dollars. N.e.c. indicates not elsewhere classified. Figures for 1960 are as originally issued and have not been revised to include published corrections. Figures for 1959 include revisions published with the December 1959 reports, or earlier, but do not include revisions published during 1960. See "Explanation of Statistics" for information on sampling procedures and effect thereof on the data shown.)

¹For definitions of countries as used in this report, refer to current edition of Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. ²Country detail is not reported in the export statistics for Special Category commodities beginning July 1950 for security reasons. For certain areas, export totals include Special Categories, as shown at the beginning of the table. Export figures for other areas and countries represent total exports less exports of Special Category commodities. See the April 1958 issue of Foreign Trade Statistics Notes for further explanation and list of Special Category commodities. ³Includes \$ 94.0 million of Military Mutual Security Program shipments (\$ 25.8 million to Western Europe). ⁴Includes \$ 114.7 million of Military Mutual Security Program shipments (\$ 51.2 million to Western Europe). ⁵Includes \$ 140.2 million of Military Mutual Security Program shipments (\$ 94.5 million to Western Europe). ⁶Includes \$ 102.3 million of Military Mutual Security Program shipments (\$ 54.9 million to Western Europe). ⁷As explained in the April 1958 issue of Foreign Trade Statistics Notes, this is an arbitrary category established with April 1958 statistics to cover certain shipments to unidentified countries in Western Europe.
